Subject : Annex XVII to Regulation (EC) No 1907/2006 – restriction of synthetic polymer microparticles

Hi Ash,

Today, we could consider, based on the suppliers' information, that none KF products contain microplastics raw materials.

However, we are still waiting from some suppliers responses due the uncertainty of the directive and the guidance for applying the restriction which has been edited in April 2025.

Nevertheless, to avoid any misunderstandings, all the products launched since 2023 already have the expected information on the packaging. For older products, the information will be updated in line with the CLP, in the next few months.

It is also important to keep in mind that all the supply chain has the same application date, which makes the application of the restriction requirements particularly challenging.

We remain at your disposal for any further information

Sincerely

Pamiers, Oct. 10th, 2025

Patrick Marfaing
Regulatory director
