**EN** Do not use the shower for at least 24 hours in order to allow the silicone sealant to cure fully.

**FR** N'utilisez pas la douche pendant au moins 24 heures afin de permettre à l'agent d'étanchéité à base de silicone de sécher entièrement.

**PL** Po zakończonym montażu, nie używaj brodzika prysznicowego przez co najmniej 24 godziny, aby umożliwić pełne osadzenie się uszczelnacza silikonowego.

**DE** Die Duschwanne mindestens 24 Stunden nicht benutzen, damit die Silikonversiegelung vollständig abbinden kann.

**RUS** Не используйте душевой поддон минимум 24 часа, чтобы силиконовый герметик полностью застыл.

**RO** Nu utilizați cădița de duș timp de cel puțin 24 de ore, pentru a permite agentului de etanșare din silicon să etanșeze pe deplin.

**ES** No utilice el plato de ducha durante al menos 24 horas para dejar que el sellado de silicona se endurezca del todo.

**PT** Não use a base de chuveiro durante, pelo menos, 24 horas, de modo a permitir que o vedante de silicone assente por completo.

**TR** Silikon dolgunun tam olarak kurumasını sağlamak için duş teknesini en az 24 saat kullanmayın.

## The golden rules for care

**NOTE:** Use warm soapy water and a soft damp cloth to keep the glass clean. Wipe dry with a clean cloth. Glass cleaner can be used if required. Scourers, abrasives and chemical cleaners can damage the glass and pattern, and should not be used.

In hard water areas, insoluble lime salts may be deposited on the glass. If this is allowed to build up it becomes increasingly difficult to remove and looks unsightly. Regular cleaning will minimize this effect.

- Do not attempt to cut the glass.
- Do not strike the glass with hard or pointed items.
- Regularly check moving parts such as rollers and hinges to ensure they are secure and adjusted correctly. Tighten and adjust where required. Also check all sealed joints to ensure seal has not deteriorated. Re-seal if required.

**FR**

## Les règles d'or pour l'entretien

**REMARQUE :** Utilisez de l'eau tiède savonneuse et un chiffon doux humide pour garder la vitre propre. Essuyez à l'aide d'un chiffon propre. Si nécessaire, vous pouvez utiliser un produit pour vitres. Grattoirs, abrasifs et nettoyeurs chimiques peuvent endommager la vitre et le motif, et ne doivent ainsi pas être utilisés.

Dans les zones dont l'eau est dure, un dépôt de calcaire peut se former sur la vitre. Si vous le laissez s'accumuler, il deviendra de plus en plus difficile à enlever, et sera inesthétique. Un nettoyage régulier permet de réduire cet effet.

- Ne tentez pas de découper la vitre.
- Ne cognez pas la vitre avec des objets durs ou pointus.
- Vérifiez régulièrement les pièces mobiles telles que les rouleaux et charnières afin de vous assurer qu'elles sont solidement fixées et correctement réglées. Serrez et ajustez-les lorsque nécessaire. Vérifiez également tous les joints scellés afin de vous assurer de l'intégrité de l'étanchéité. Scellez à nouveau au besoin.
